

CASE STUDY

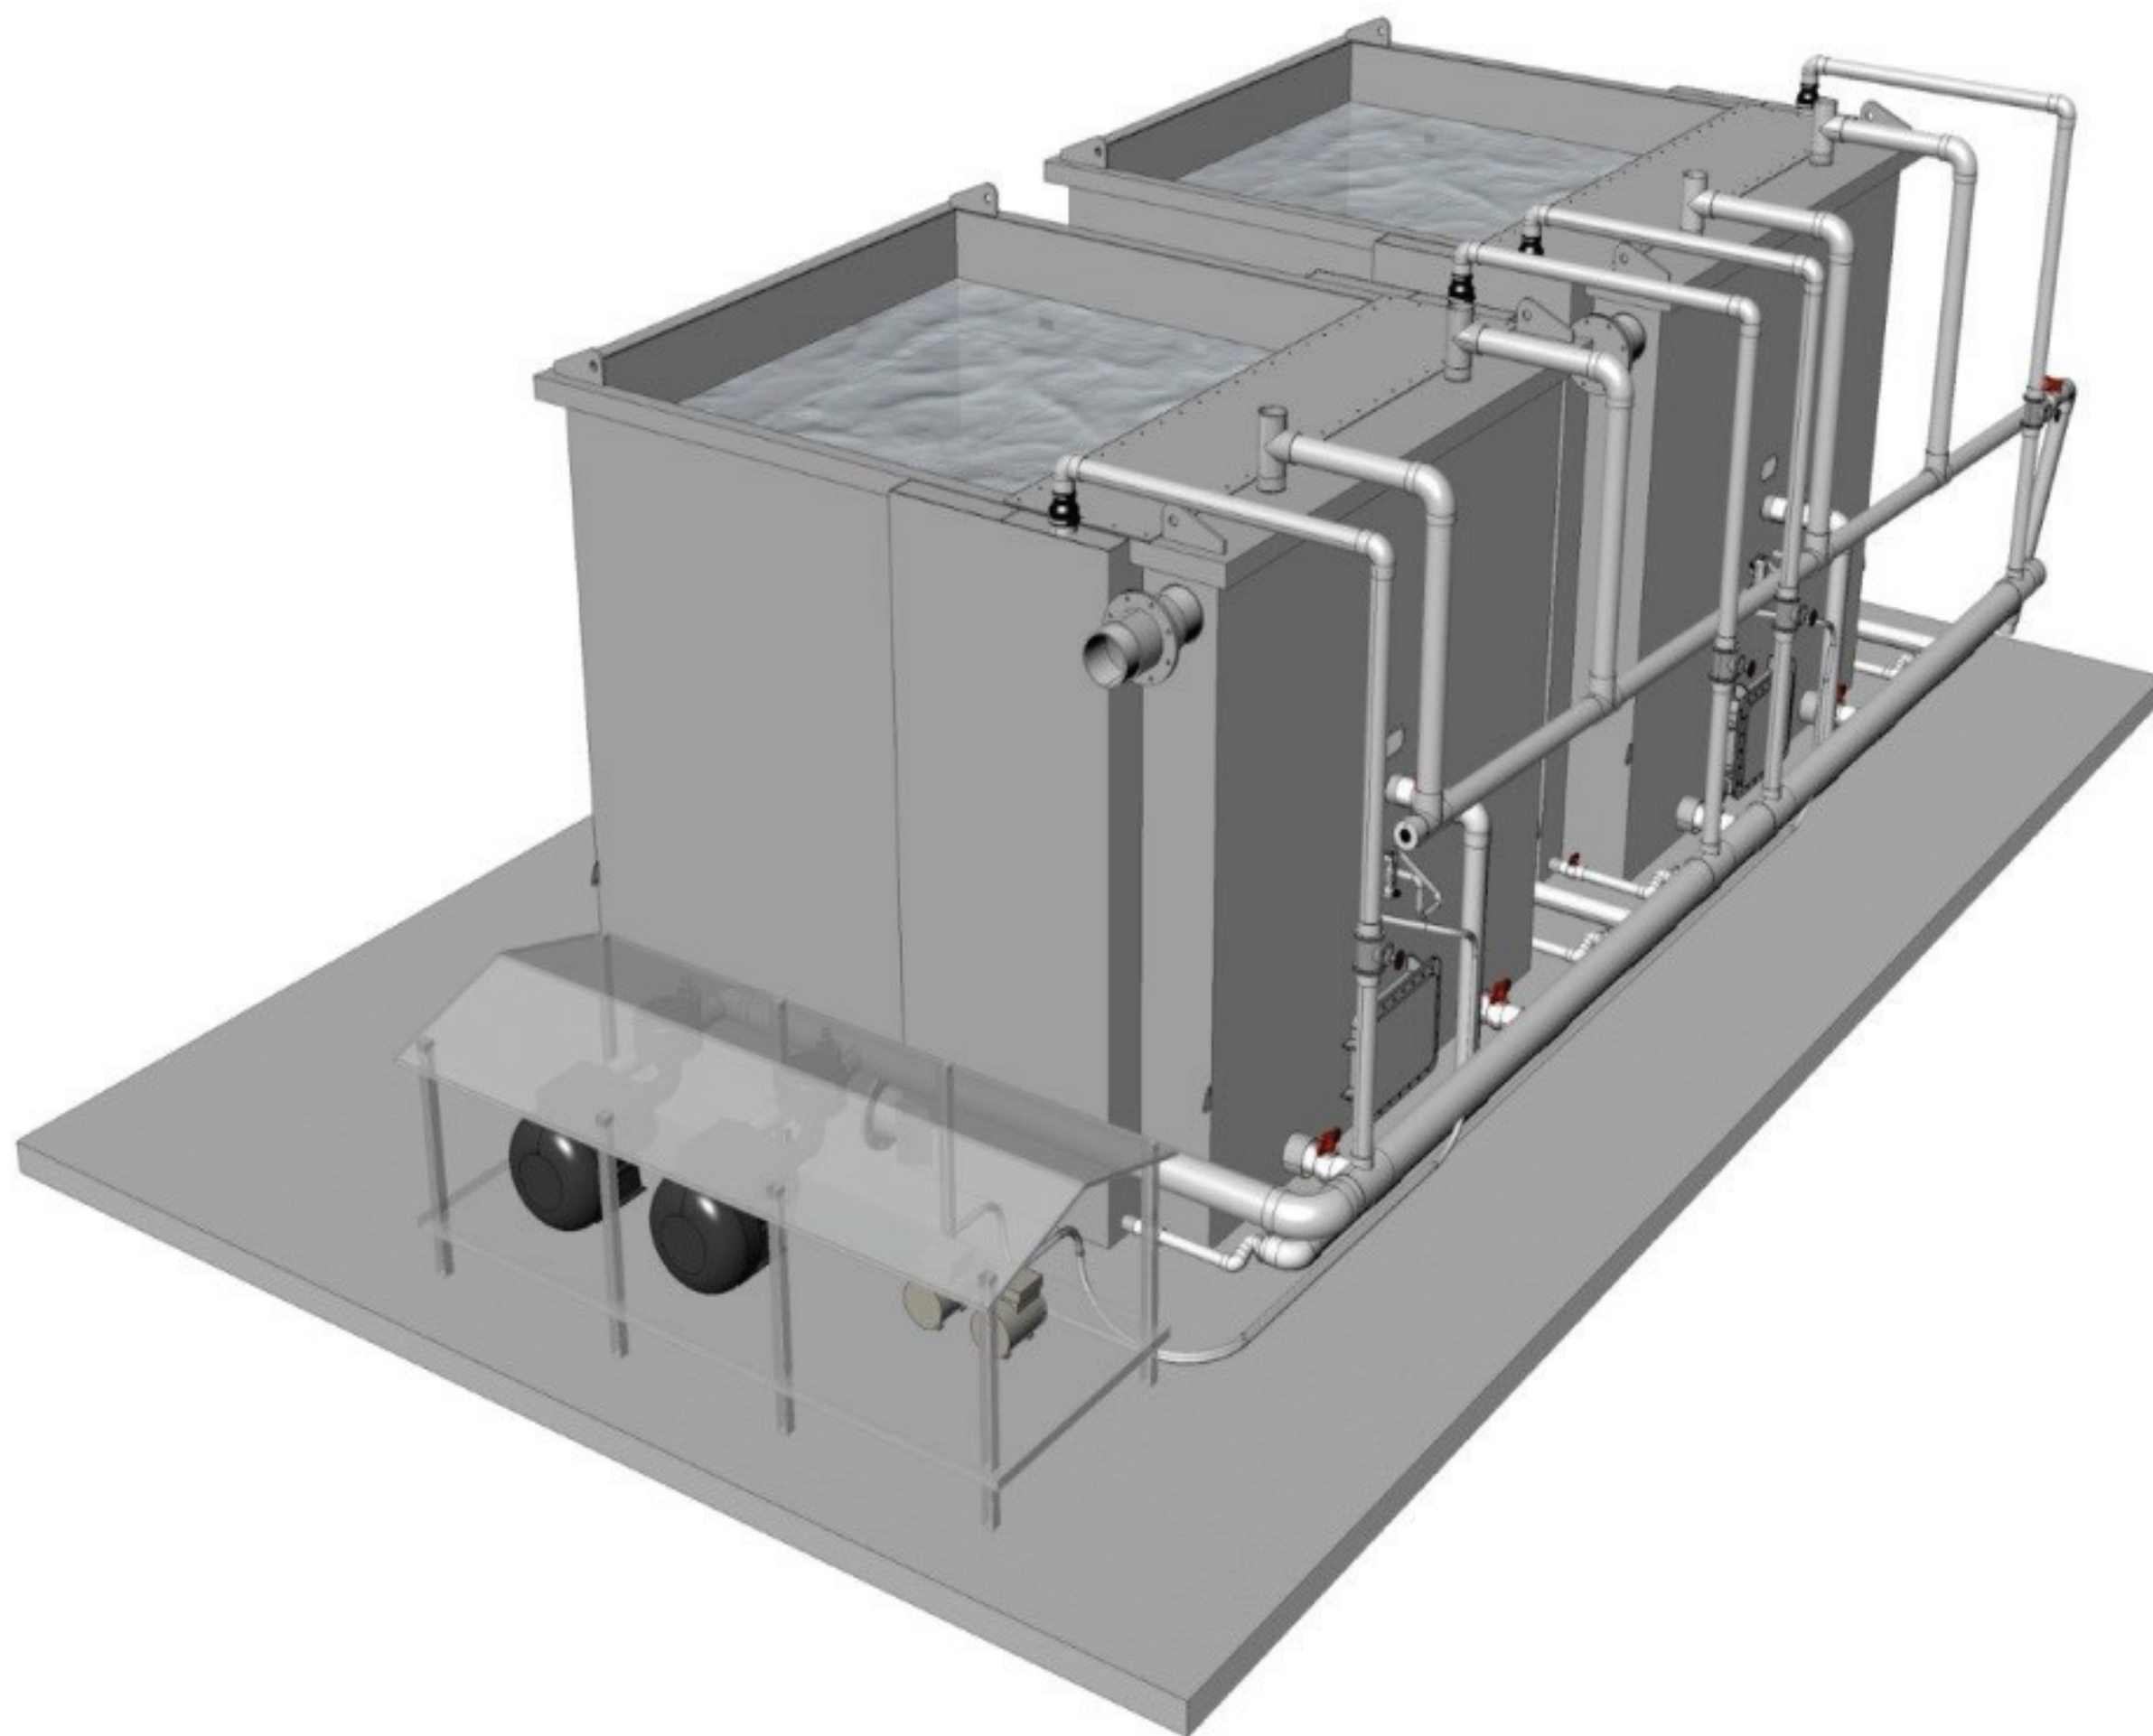

MOORHEAD

PROBLEM

The facultative lagoon needed ammonia polishing in order to meet new discharge standards.

SOLUTION

AST implemented the first dual full-scale RCPG 250 treatment train installation to treat the waste stream for BOD, TSS, and ammonia.

System Benefits:

- High efficiency
- Low O&M
- Automated Non Mechanical Backwash
- Simultaneous Mechanical and Biological Filtration

System Applications:

- Municipal and Industrial Wastewater
- High Strength Wastewater
- Pristine Polishing

INNOVATION | SIMPLICITY | MULTI-FUNCTION

If you have questions about AST's filtration systems or you would like to learn how we can help with your filtration needs, please call us at **1 (504) 837-5575**. We would be happy to help you size a system of your own.
