PERFORMANCE LINER® SECTIONAL SYSTEM

The Performance Liner® Sectional System is a cured-in-place process that renews pipes from 6 to 42 inches in diameter and in continuous lengths up to 75 feet. The liner can be inverted anywhere in the pipe with no trimming or cutting. The result is a structural, root-proof, watertight seal.

FEATURES:

- ASTM F2599 & ASTM F3240 compliant
- One-step air inversion point repair prevents resin contamination & loss
- Gasket-sealing O-rings at the terminating points of the liner create a watertight seal
