

VAC-A-TEE[®] CLEANOUT SYSTEM

The VAC-A-TEE[®] Cleanout System is a trenchless outside cleanout system that allows access to the lateral pipe for cleaning, inspecting and lateral lining. It consists of a patented VAC-A-TEE[®] saddle and riser pipe affixed with adhesive. It is a clean, safe, environmentally friendly, user-friendly and installer-friendly method for installing a new cleanout.

FEATURES:

- ASTM F3097 compliant
- Structural connection with saddle covering more than 180° of host pipe
- Fail-proof, high-strength bond to the host pipe
- Compatible with all pipe types including clay, cast iron, concrete, PVC & HDPE
- Pipe diameters of 6 inches or less at lateral depths to 15 feet
- Minimally invasive — vacuum excavation eliminates the potential hazards of digging up buried gas or water utility lines & leaves no damage to landscaping
