SERVICE FITTINGS

## Megatite<sup>®</sup> System for CTS Size Plastic Pipe

Megatite is an easily removable push-fit design for standard CTS-size plastic pipes. Made of high-strength, corrosion-resistant composite material and designed to last a lifetime of service.

**Megatite for Plastic** is interchangeable with Megatite for Copper by simply changing the gripper, restraint, and nut assembly.

- Megatite works equally well on PERT, PEX or Polyethylene pipe and with the pull-out strength of the push joint, stronger than the pipe, there is no fear of joint separation.
- All components are constructed from composite materials and come with a guarantee of not releasing any harmful metals into the potable water system.
- From tappers, couplings, adaptors, curbstop and meter valves, the Megatite connection has been integrated into a range of fittings to get the job done.
